README for the 'inputtrc' package

Tracing Which File Loads Which

(C) Uwe Lueck 2012/10/10

http://www.contact-ednotes.sty.de.vu

'inputtrc.sty' produces screen/log messages
'<current> INPUTTING <next>' on LaTeX input commands,
<current> and <next> being file names.
The message indents reflect the input nesting level.
This can be turned on and off, and the "indent unit"
can be chosen. 'RETURNING TO <current>' may be added.
These messages should help when you otherwise get a screen
message about some input line number and wonder in which
file that is.

The implementation somewhat resembles packages 'currfile',
'filehook', 'FiNK', and 'inputfile'.

Typesetting the documentation requires the 'nicetext' bundle,

    http://ctan.org/pkg/nicetext

'inputtrc' is author-maintained in the sense of LPPL below.

'inputtrc.sty', its documentation 'inputtrc.pdf', and the
latter's source 'inputtrc.tex' can be redistributed and/or
modified under the terms of the LaTeX Project Public License;
either version 1.3c of the License, or any later version.
The latest version of this license is in
