

Sectioning commands with critical notes in parallel columns

This file provides examples of using sectioning commands with `reledpar`. The section titles are in the line numbering, and have critical notes.

The left and right sides are put in columns. We use `\eledsectnotoc{L}` to say we want the right titles be added to the table of contents, and not the left titles. We also use `\eledsectmark{R}` to use the right side to add \LaTeX marks for headers.

We use the `\reledxxx` commands, each of them in their own `\pstart . . . \pend` group. Page clearings are manually added before chapter with `\beforeeledchapter`.

Contents

- 1 Right chapter** **5**
- 1.1 Right section 5
- 1.1.1 Right subsection 5
- 1.2 Right section 5

- 2 Right chapter** **7**
- 2.1 Right section 7
- 2.1.1 Right subsection 7
- 2.2 Right section 7

Chapter 1

1 Left chapter

2 I use git to manage some packages.
 3 I would like to add a pre-commit hook,
 4 to check if I have forgotten For now,
 5 I have a minimal pre-commit, which
 6 tests only the blank spaces at ends of
 7 lines, but not the forgotten..

1.1 Left section

1.1.1 Left subsection

Left subsubsection

11 I use git to manage some packages.
 12 I would like to add a pre-commit hook,
 13 to check if I have forgotten For now,
 14 I have a minimal pre-commit, which
 15 tests only the blank spaces at ends of
 16 lines, but not the forgotten.
