NAME

aom−fullref.pl − confert references to aomart fullref commands

SYNOPSIS

aom−fullref.pl INPUT > OUTPUT

DESCRIPTION

Aomart class <https://ctan.org/pkg/aomart> uses commands like
`\fullref{Theorem}{ref}` to generate clickable reference to constructions like "Theorem 7" or "Equation 4". This script changes all `\ref` and `\pageref` commands into `\fullref` and `\pfullref` commands suitable for use with aomart.
