

This is a sample document testing nested link text. The `glossaries-extra` package temporarily modifies commands like `\gls` or `\glsxtrshort` that occur in fields, when any of those field is accessed through linking commands.

1 Hypertext markup language

Make sure you have `glossaries.sty` v4.50+ and `mfirstruc.sty` v2.08+ for improved sentence-casing.

First use: `SSI enabled HTML (SHTML)`.

Next use: **SHTML**.

Glossary

HTML hypertext markup language [1](#), [3](#)

SHTML server side includes (ssi) enabled hypertext markup language (HTML)
[1](#), [2](#)

SSI server side includes [1](#), [3](#)
